

ELECTRONIC SECURITY · TECHNOLOGY INTEGRATION

Integrated protection. Built for the real world.

Securatech designs, installs and supports electronic security and technology systems that protect people, property and valuable assets across Tasmania.

COMBINED EXPERIENCE

TAS

STATEWIDE DELIVERY

COMMERCIALLY FOCUSED**Tasmanian owned.**

Established in 2017, Securatech is a Tasmanian-owned and operated security and technology integration business. Commercial installation and support is our core focus, with residential services also available.

EXPERIENCE**Experience with practical accountability.**

More than 25 years of leadership experience and over 30 years of combined team experience supports project delivery, scheduled maintenance and ongoing service requirements.

NATIONAL CONTRACT SUPPORT**Tasmanian delivery for national providers.**

We commonly support mainland security companies and national service organisations with local installation, commissioning, maintenance and site attendance for national contracts - delivered to the principal contractor's standards, documentation and communication requirements.

WHERE WE OPERATE**Local roots. Statewide reach.**

Based on Tasmania's North West Coast, we support major centres, regional towns, remote communities and island locations with scalable technical resourcing.

OUR CAPABILITY

Core security. Connected support.

We design around the site and its operating requirements, then bring the appropriate technology, infrastructure and support together as one coordinated system.

01 • REVIEW

Video Surveillance

IP cameras, recording, NX Witness video management, analytics, event rules, remote viewing and system health.

02 • ACCESS

Access Control

Electronic and wire-free locking, credentials, user permissions, audit trails and enterprise systems.

03 • DETECT

Electronic Security

Intrusion, perimeter and environmental detection, video verification, duress and notifications.

04 • COMMUNICATE

Public Address & Network Audio

Commercial 100V PA, IP audio, zoning, paging, priority control, tones and scheduling.

05 • CONNECT

Integration & Infrastructure

Platform integration, structured cabling, testing, documentation, Wi-Fi and remote connectivity.

06 • PROTECT

Rapid-Deployment Security

Portable monitored security, wireless detection, video, active deterrence and remote visibility.

DESIGNED AROUND OPERATIONS

System selection considers the site risk, users, infrastructure, lifecycle and support model. The outcome is useful information, controlled access, clear communication and dependable long-term operation.

SUPPORT

AWARENESS BEYOND THE PROTECTED SITE

People. Sites. Mobile assets.

Securatech can design and coordinate monitored solutions that extend protection beyond a fixed building. Response pathways are configured around the client, risk and selected monitoring provider.

01 • PEOPLE

Duress & lone-worker monitoring

Fixed, portable and app-connected duress options for staff working alone, moving between locations or operating in higher-risk environments. Capabilities can include panic activation, check-ins, escalation workflows and location context.

02 • SITES

Control-room & remote video monitoring

Alarm, system and video events can be presented to an approved monitoring control room. Live or recorded vision, video verification, analytics and event rules provide better context before action is taken.

03 • MOBILE ASSETS

GPS tracking & fleet management

GPS-based tracking can provide live vehicle and mobile-asset visibility, trip history, geofencing, operational alerts and fleet reporting configured around the organisation's needs.

COMMON APPLICATIONS

Commercial workplaces

Remote & regional sites

Education environments

Construction projects

Mobile workforces

Vehicle & asset fleets

Monitoring availability, response services, mobile coverage and tracking features depend on the selected platform, communications, monitoring provider and service agreement.

SELECTED TECHNOLOGY

Integrated with purpose.

01 SALTO Systems Smart and wire-free access	02 Ajax Systems Intrusion and verification	03 NX Witness Video management and analytics
04 Australian Monitor Commercial public address	05 Axis Network Audio IP paging and PoE audio	06 Inner Range Inception Web-based integrated security
07 Inner Range Integriti Enterprise integrated security	08 ICT Protege WX Browser-managed security	09 DFNDR X Rapid-deployment security

CAPABILITY BACKED BY ACCOUNTABILITY

01 Certified capability SALTO, Ajax, NX Witness and Inner Range certified capability, with Axis partner status.	02 Licences & competencies Relevant cabling registration, WWVP, police checks and working-at-heights competency.
03 Industry membership Member of the Australian Security Industry Association Limited (ASIAL).	04 Insured delivery Public liability, professional indemnity and workers compensation insurance maintained.

PLATFORM SELECTION

We match platforms to scale, credential type, communications, integration, reporting and support requirements. This lets single sites, growing organisations and multi-site environments adopt technology appropriate to their operational needs.
